**Length:** 2 Miles **Marking:** Blue Blazes/Arrows

Lakeview Bend Trail offers an amazing amount of natural community diversity. Towering dolomite bluffs and steep rocky slopes that were the result of the erosive forces of the Grand Glaize River can be found along one section of this trail. Here, you will see views of the Lake as well as native columbines and ferns. Gentle slopes through native Ozark woodlands are characterized by the other half of this trail. Native white-tailed deer and fox squirrels are frequently seen along this trail.
